Lab 01

Part 1 -- Challenges
Identify at least 4 challenges to fitting this data into the relational data model.

1. Not every row in the sheet has a file location
2. Not every row in the sheet has a username
3. Not every row in the sheet has a duration
4. Not every duration is formatted uniformly
5. Not every row in the sheet has a stream date
6. Not every stream date is formatted uniformly
7. Not every instance of followers is the same data type (integer, array of strings)

Part 2 -- Diagramming with Draw.IO
